

COMPANY BACKGROUND

Established in 2012, the JBM Solar team has a proven track record of developing over 480MW of clean, green solar energy schemes across a range of locations in the UK and Ireland. JBM is focused on providing solar projects that will help to de-carbonise the UK and Ireland's electricity generation and combat the current climate crisis. Furthermore, JBM always places a key focus on community engagement and ensuring considerable biodiversity gains throughout each of their sites.

JBM is focused on providing clean solar energy

Community Consultation

JBM prides itself on understanding the views of local residents and constituents in order to improve the proposals based on local knowledge and input.
